## ABOUT PROVENANCE

Providing comprehensive end to end contract services to pharmaceutical, biotechnological and medical devices industries.

### Vision

To become a leading pharmaceutical contract services provider by accomplishing continual growth in global market.

### Mission

Our mission is to provide pharmaceutical clients and partners, superior and high quality contract services that consistently exceed the client's expectations with high ethical values for the benefit of public health.

### Drug Development Solutions

Provenance offers contract services to pharmaceutical, biotechnological and medical devices clients for developing products that not just save lives but also improve the quality of lives. Provenance welcomes you to explore partnering possibilities for services throughout the life cycle of the product.

The need for delivering credible and high quality data within tight timelines is a challenging proposition in contract services market. Provenance understands your business needs, timelines, scientific and cost imperatives and delivers exactly what is expected.

Our team of experienced clinical research professionals will ensure that you receive the best VFM (value for money) services within required timelines.

Provenance believes in pro-active initiatives and project management to deliver its services and is well equipped with experienced resources, systems and processes to handle the toughest of product development challenges.

Our portfolio of services range from proof of concept (POC) studies to post marketing surveillance (PMS) studies.

## CORE VALUES AND EXPERTISE

.INTEGRITY. .INNOVATION. .CUSTOMER FOCUS. .LEADERSHIP. .EXCELLENCE. .TEAM WORK.

Therapeutic expertise and experience is paramount to effectively design, manage, and analyze data from clinical trials for new drugs and devices.

Provenance's therapeutic expertise is but not limited to Cardiovascular, Central Nervous System, Infectious Disease, and Oncology. Particularly in these areas, Provenance offers

broad study experience and direct knowledge of study requirements, design, risk management, and best practice implementation.

One of the greatest challenges associated with any trial is to quickly initiate projects in order to save on time and money. Provenance understands the importance of accelerating this process

and has structured its procedure in a way that streamlines the process of initiation and execution of clinical project.

We invite you to explore partnering options with us for developing your product throughout the course of its life cycle.

## SERVICES OFFERED

Provenance offers quality driven services backed with skilled resources and assisted by world class systems.

## THE PROVENANCE ADVANTAGE

Why partner with Provenance?

### Pro-active Initiatives

Patient recruitment, regulatory approval or investigator recruitment are some of the key challenges faced by drug sponsors conducting clinical trials. Provenance adopts pro-active steps like creation of internal quality and risk management plan before start of the project to prevent any delays in the course of trial.

### Micro Management

Provenance adopts customized micro-management strategy for all its clients, with appropriate dedicated staff working on projects that need utmost attention and coordination to prevent any quality issues.

### Provenance People

Provenance consists of highly skilled, passionate and motivated people who are more than willing to walk the extra mile to ensure implementation of quality in all projects and services, our in-house quality management team ensures the maintenance of quality through periodic review of projects and services to ensure compliance to the protocols and guidelines.

### The Cost Factor

Provenance understands the importance of research and development of molecules for a safe tomorrow and in view of the same offers high quality services on par with leading service providers at competitive prices to prevent additional financial burden to our clients.

### The Power of Web solutions

Provenance offers a unique experience of the emerging IT power in capturing and reporting clinical trial data using its internal clinical trial management software, this mode of capture and reporting ensures timely retrieval of data and accurate tracking of the study statistics and will help resources across projects to save time and improve efficiency

### Vast Pool of Investigators

Provenance has a huge database of Investigators across varied therapeutic areas from leading academic and medical institutions to specialized clinical research centers who are ICH-GCP trained and have vast experience in conducting clinical trials. Provenance also offers ICH-GCP and other appropriate training to its contracted sites for appropriate conduct of trials.

### CLINICAL DEVELOPMENT

- Conceptualization of Study Design
- Study Documents Preparation & Review
- Regulatory Writing
- Medical Management
- Medical Monitoring, Safety Data Handling & Reporting

### CLINICAL OPERATIONS

- Phase I - IV studies & BA/BE studies
- Study Management
- Site Management
- Clinical Monitoring

### BIOSTATISTICS

- Statistical inputs for protocol design
- Sample size calculation
- Randomization
- SAS coding
- Statistical analysis
- Statistical report preparation

### QUALITY ASSURANCE

- Quality management systems

### INVESTIGATOR RECRUITMENT

### PATIENT RECRUITMENT
